SUMMARY

B.E. Computer Science (AI & ML) undergraduate at Mumbai University with certifications in Python, Data Science, and Generative AI. Currently completing a Data Analytics & Data Science internship at Imarticus Learning. Skilled in Python, Machine Learning, SQL, and web development. Passionate about building AI-based applications and solving real-world problems through data-driven solutions.

EDUCATION

B.E. – CSE(Artificial Intelligence and Machine Learning)

2024 – 2028

Smt. Indira Gandhi College of Engineering, Mumbai University

HSC – Science–78.67%

2022 – 2024

V.G. Vaze College, Mulund

TECHNICAL SKILLS

Languages: Python, C, C++, Java, Kotlin, SQL, HTML, CSS, JavaScript

ML / AI: Scikit-Learn, TensorFlow, Keras, Pandas, NumPy, Matplotlib, Seaborn

Tools: Power BI, Tableau, MySQL, MongoDB, Firebase, React.js, React Native, GitHub, Excel

EXPERIENCE

Data Analytics & Data Science Intern

May -June 2026

Imarticus Learning, Mumbai - 1-Month Intensive Program

- Performed Exploratory Data Analysis (EDA) using Pandas and NumPy; created visualizations in Matplotlib and Seaborn to surface actionable business insights from real-world datasets.
- Implemented supervised ML models including Linear Regression and Classification algorithms; evaluated model performance using accuracy, precision, and recall metrics.
- Applied SQL-based querying for data extraction, transformation, and pipeline preparation.

HACKATHONS

- Participated in Smart India Hackathon (SIH) 2025 – national-level competition building real-world solutions under time constraints.
- Participated in Multiverse of Tech – College Hackathon; demonstrated teamwork and rapid prototyping skills.
- Gained hands-on experience in problem-solving, collaborative development, and real-world project execution.

PROJECTS

ProofX – Gasless NFT Certificate Platform

2026

- Built a Web3 application for creating and verifying NFT-based digital certificates
- Enabled gasless minting using UGF, allowing users to mint certificates without ETH.

Telemedicine Platform with AI Chatbot

2026

- Built a telemedicine website with an AI chatbot providing first-aid guidance and initial health support to remote users.
- Designed chatbot interaction engine to answer basic medical queries and triage symptoms using NLP techniques.

MindWell – Mental Health Awareness Platform

2025

- Developed a web platform to improve mental health awareness among technical students, integrating mindfulness games, relaxing music, and guided practices.
- Designed UX flows aimed at reducing academic stress and improving user focus through simple digital wellness tools.

SecurePass AI- AI-Powered Cybersecurity & Password Intelligence Platform

2026

- Built real-time password strength analyser and secure password generator using ML-based pattern detection.
- Developed brute-force attack simulator for cybersecurity awareness and integrated breach detection system with security insights dashboard.

CERTIFICATIONS & ACHIEVEMENTS

- Python for Data Science – Saylor Academy
 - Oracle Cloud Infrastructure 2025 – Generative AI Professional Certification
 - Deloitte Data Analytics Job Simulation – Completed virtual analytics project
- Google Cloud – Agentic AI Day Participation
- Nestlé E-learning 2026 (Resilience)
- Internship Common Aptitude Test (iCAT) – Qualified
